Supply Chain Technology Transformations Done Right

Successful supply chain transformation means every stakeholder has a seat at the table and an opportunity to align on goals and values. Dyci will discuss who should be involved in supply chain technology and software implementations and how to ensure the people component of your transformation journey is fully covered. Download the e-book in advance

Presenter: Dyci Sfregola, CSCP | CEO

When it comes to supply chain and product operations, Dyci Sfregola's experience is that most organizations are leaving money on the table due to disorganized processes. She founded New Gen Architects to show companies how to transform business operations starting with their supply chain. Leveraging her business acumen and technical expertise, Dyci's vision is to empower clients to be customer-centric and scale intelligently. Through business and digital architecture advisory services, she directs clients on how to establish efficient processes, identify and implement digital technologies, and effectively engage people as a roadmap for success.
