Member-Only Webinars

Access to Hot Topics, Research and Skill-Building

Webinar Topics:

- Supply Chain Costing and Performance Management
- The Net Zero Challenge: How Procurement Leads the Way in Decarbonization of Supply Chains
- Showing Up and Staying In Uncomfortable Conversations (skill-building)
- Quarterly State Of Risk Update

Hi ISM friend,

Welcome to the first Corporate Partner Webinar of 2021!

Please join us as we explore "**The Net Zero Challenge—How procurement Leads the Way in Decarbonization of Supply Chains**," presented by Daniel Weise and Nino Mori.

Daniel Weise, managing director and partner of Boston Consulting Group and the global lead of its procurement practice and Nino Mori, principal at Boston Consulting, will share insights from their most recent collaboration with the World Economic Forum (WEF).

They will address how to achieve a net-zero supply chain with minimal additional costs and how supply-chain emissions enable many customer-facing companies to impact emissions several times higher than if they were to focus on decarbonizing their direct operations and power consumption alone.

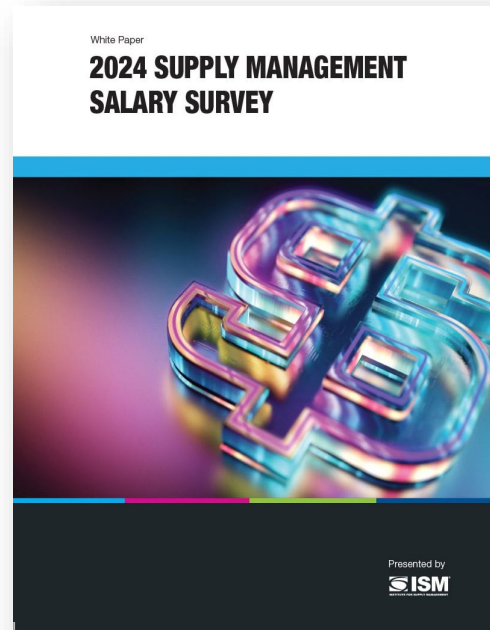

Member-Only Content

Access to the latest research, tools, templates and articles

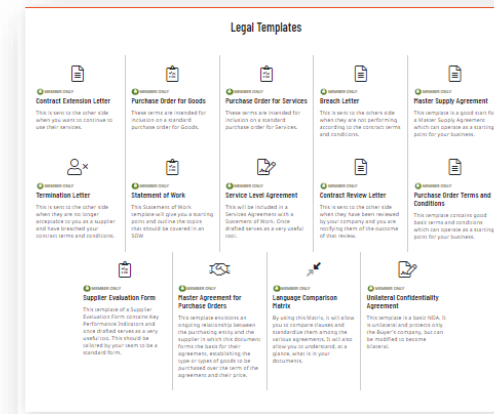

Inside Supply Management® Magazine

ISM® PMI® Reports

Leading the Industry with Reliable Economic Indicators

Manufacturing (PMI®)

Services (PMI™)

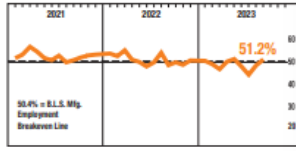

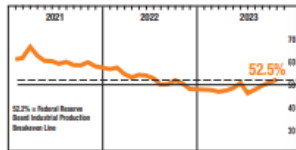

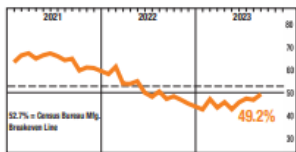

Hospital (PMI™)

The **ISM® PMI® Reports** are based on a national survey of supply chain professionals tracking changes in the manufacturing, non-manufacturing and hospital sectors. They are one of the most reliable economic barometers of the U.S. economy and gives an important early look at the health of the nation's economy

ISM® PMI® Reports

Leading the Industry with Reliable Economic Indicators

Using the reports for Demand Forecasting

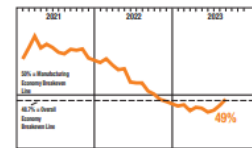

Economic activity in the manufacturing sector contracted in September for the 11th consecutive month following a 28-month period of growth, say the nation's supply executives in the latest Manufacturing ISM® Report On Business®.

The overall economy expanded weakly after nine months of contraction following a 30-month period of expansion. (A Manufacturing PMI® above 48.7 percent, over a period of time, generally indicates an expansion of the overall economy.) The Manufacturing PMI® registered 49 percent. The New Orders Index remained in contraction territory at 49.2 percent, 2.4 percentage points higher than the figure of 46.8 percent recorded in August. The Production Index reading of 52.5 percent is a 2.5-percentage point increase compared to August's figure of 50 percent. The Prices Index registered 43.8 percent, down 4.6 percentage points compared to the reading of 48.4 percent in August. The Backlog of Orders Index registered 42.4 percent, 1.7 percentage points lower than the August reading of 44.1 percent. The Employment Index registered 51.2 percent, up 2.7 percentage points from the 48.5 percent reported in August. The Inventories Index increased by 1.8 percentage points to 45.8 percent; the August reading was 44 percent. The New Export Orders Index reading of 47.4 percent is 0.9 percentage

MANUFACTURING PMI® at 49%

The U.S. manufacturing sector contracted in September, as the Manufacturing PMI® registered 49 percent, 1.4 percentage points higher than the reading of 47.6 percent recorded in August and its highest figure since November 2022 (49 percent). This is the 11th month of contraction, but the third month of positive change. Of the five subindexes that directly factor into the Manufacturing PMI®, two (the Production and Employment indexes) are in expansion territory, up from none in August, breaking a three-month streak of no such growth.

Manufacturing at a Glance

INDEX	Sep Index	Aug Index	% Point Change	Direction	Rate of Change	Trend* (months)
Manufacturing PMI®	49.0	47.6	+1.4	Contracting	Slower	11
New Orders	49.2	46.8	+2.4	Contracting	Slower	13
Production	52.5	50.0	+2.5	Growing	From Unchanged	1
Employment	51.2	48.5	+2.7	Growing	From Contracting	1
Supplier Deliveries	46.4	48.6	-2.2	Faster	Faster	12
Inventories	45.8	44.0	+1.8	Contracting	Slower	7
Customers' Inventories	47.1	48.7	-1.6	Too Low	Faster	4
Prices	43.8	48.4	-4.6	Decreasing	Faster	5
Backlog of Orders	42.4	44.1	-1.7	Contracting	Faster	12
New Export Orders	47.4	46.5	+0.9	Contracting	Slower	4
Imports	48.2	48.0	+0.2	Contracting	Slower	11
Overall Economy				Growing	From Contracting	1
Manufacturing Sector				Contracting	Slower	11

*Number of months moving in current direction. Manufacturing ISM® Report On Business® data has been seasonally adjusted for the New Orders, Production, Employment and Inventories indexes.

1. Monitor PMI Trends
2. Analyze Sub-Indices
3. Compare with Company Data
4. Adjust Procurement Plans
5. Supplier Communication
6. Forecast Lead Times

ISM[®] Certification

CPSM[®] and CPSD[™] are world renowned certifications that enhance team expertise, knowledge and skill.

Certification

Globally Recognized Industry Standard

CERTIFIED PROFESSIONAL IN SUPPLY MANAGEMENT® CPSM®

Obtaining a CPSM indicates that you have achieved a level of expertise in skills in supply management. The credential signals the level of expertise, commitment and skill for those professionals who take ownership of their careers.

CERTIFIED PROFESSIONAL IN SUPPLIER DIVERSITY™ CPSD™

Obtaining a CPSD indicates that you have achieved a level of skill in supply diversity -- a unique area of practice which sets professional apart from the rest.

ASSOCIATE PROFESSIONAL IN SUPPLY MANAGEMENT™ APSM™

APSM allows active ISM student members to take control of their career development. During the beginning of a supply chain career, an APSM certification helps you stand out from the professional competition.

Certification Process

We Can Help You Achieve Success

Certificate Programs

Fourteen Skill-based Programs

Designed to rapidly upskill and train individuals on focused supply chain competency areas

Each Program Includes

- 5 self-paced courses
- 60-day access
- Knowledge check quiz
- Certificate of completion
- 6 CEHs per certificate
